

BACHELOR OF BUSINESS ADMINISTRATION (HONOURS) IN GLOBAL LOGISTICS

JPT/BPP(N/0414/6/0335) 11/29, (MQA/PA17901)

DESCRIPTION OF PROGRAMME

The Bachelor of Global Logistics degree is carefully designed to provide students with the skills and knowledge they need to succeed in global logistics and supply chain management. The curriculum includes basics in logistics, transportation, and supply chain management. Students will deep-dive into the industry-specific skills of inventory management, distribution tactics, transportation planning, and international commerce rules. The training combines theoretical and practical knowledge to equip graduates for logistics industry difficulties.

The curriculum emphasises fundamental topics, critical thinking, problem-solving, and communication. Students will encounter global logistics trends and technology through case studies, projects, and internships. The Bachelor of worldwide Logistics curriculum seeks to generate graduates with worldwide perspectives, and are adaptable to the ever-changing dynamics of global organisations, logistics service providers, and government agencies.

PROGRAMME HIGHLIGHTS

- Fostering analytical mind and good communication skills
- Blend of conventional and experiential learning
